

You should consider the portfolio's investment objective, risks, and charges and expenses carefully before investing. Contact your financial advisor or visit SEC.gov to obtain a prospectus, which contains this and other information about the portfolio. Read it carefully before you invest.

Investment objective

The trust seeks to provide a percentage return per unit at maturity equal to any percentage increase in the value of the SPDR® S&P 500® ETF Trust (SPY) relative to its Initial Reference Value (the "Equal Upside"), up to a maximum total return of 13% (the "Capped Return"), while providing protection against any price decreases in SPY in excess of -5% and up to -35% (the "Buffer").

How it works

In pursuing its investment objective, the trust intends to hold a fixed portfolio of exchange listed options on SPY and cash. No assets in the portfolio will contain any corporate or bank credit risk (please refer to the following page for selected risk factors). All portfolio components will be disclosed in the final prospectus. Once issued, units will be redeemable on a daily basis at their net asset value (NAV). Redemptions prior to maturity may result in not meeting the trust's investment objectives. All returns will be subject to reductions due to ongoing fees. Investors will have not right to receive any dividends on the Reference Asset.

Key Indicative Features

Inception Date	June 9, 2020
Maturity Date	June 30, 2022
Reference Asset	SPDR® S&P 500® ETF (SPY)
Initial Reference Value	323.20
Equal Upside	1-to-1 of SPY
Inception Value per Unit	\$10.00
Maximum Amount per Unit*	\$11.30
Capped Return*	13%
Buffer*	-5% to -35%
Maximum Loss per Unit*	\$6.80

Expenses

Upfront	
Fee-based accounts**	
Creation & development	0.75%
Initial distribution fee	[•]%
Organization costs	
	0.30%
Ongoing	
Annual trustee fees	0.12%
Annual supervision, evaluation and admin fees	0.10%
Annual other	0.06%
Total ongoing	0.28%

CUSIP	55247F137
Symbol	MPLSOX

Hypothetical results in different market environments

* The trust's ability to provide the Capped Return, the Equal Upside, the partial protection via the Buffer, and others, depends on investors purchasing units at a price equal to their Inception Value and holding them until the Maturity Date. The return on units purchased at a price that is higher than the Inception Value will be less than for units purchased at the Inception Value.

** Accounts that charge periodic fees for brokerage services, investment advisory or other services, or provide such services in connection with a comprehensive "wrap fee" charge.

The above does not account for dividends on the ETF or m+ Buffer 30 Fund ongoing fees and expenses. The above graph is intended to illustrate potential hypothetical outcomes and is therefore based on transaction terms and hypothetical ETF returns. It does not reflect any actual past performance and, therefore, does not reflect returns that an investor could have received. Investors purchasing units are subject to upfront sales charges and organization costs, which vary per fund and depend on the type of account purchasing the units, all as described in the corresponding prospectus. Potential investors should refer to the prospectus, which details fees and expenses, as well as other important matters. Investors in m+ funds do not receive dividends.

Selected Risk Factors

You should request a copy of the prospectus, which will contain a full description of the risks, and read it carefully before you invest. Capitalized terms that are not defined in this preliminary term sheet have the meaning ascribed to them in the prospectus.

The economic terms are indicative only and will vary based on the market conditions at the time of the initial deposit of such Series.

The structure of these securities may be complex and the suitability of an investment should be considered based on your investment objective, risk tolerance, financial goals and time horizons.

This UIT is a buy and hold strategy and investors should consider their ability to hold the trust until maturity. There may be tax consequences unless units are purchased in an IRA or other qualified plan.

The trust is designed to achieve its investment objective over the life of the trust. The trust's investment objective has not been designed to deliver on its objective if the units are bought at prices different than the Inception Value of the units or are redeemed prior to the Maturity Date.

Security prices will fluctuate. The value of your investment may fall over time. Amounts available to distribute to unit-holders upon dissolution of the trust will depend primarily on the performance of the trust's investment and are not guaranteed. The value of the units will decrease over time by the trust annual fees and expenses.

m+ Buffered Fund seeks to deliver the price appreciation of the Reference Asset, up to a cap 13%, or any of the Reference Asset's price depreciation up to -5% and in excess of the Buffer, up to a maximum loss of 68% (the "Maximum Loss"), decreased by the trust's fees and expenses. You may lose a portion (up to 68%) of your investment. The trust does not provide full principal protection and you may not receive the full return of the capital you invest.

The value of the Options may change with the implied volatility of the Reference Asset, the Underlying Index and the securities included in the Underlying Index. No one can predict whether implied volatility will rise or fall in the future.

The value of the Options does not increase or decrease at the same rate as the Reference Asset. The Options are all European style options, which means that they will be exercisable at the strike price only on the Options Expiration Date. The value of the Options prior to the Options Expiration Date may vary because of related factors other than the value of the Reference Asset. The trust may experience substantial exposure to losses from the Options.

Credit risk is the risk an issuer, guarantor or counterparty of a security in the trust is unable or unwilling to meet its obligation on the security. The OCC acts as guarantor and central counterparty with respect to the Options. As a result, the ability of the trust to meet its objective depends on the OCC being able to meet its obligations.

Unit-holders will not have control, voting rights or rights to receive cash dividends or other distributions or other rights that holders of a direct investment in the Reference Asset or its constituents would have.

Liquidity risk is the risk that the value of an option will fall in value if trading in the option is limited or absent. No one can guarantee that a liquid secondary trading market will exist for the Options.

The trust might not achieve its objective in certain circumstances. Certain circumstances under which the trust might not achieve its objective are if the trust liquidates the Options prior to expiration, due to redemptions or otherwise, if the trust is unable to maintain the proportional relationship based on the number of option contracts of the Options in the trust's portfolio, or because of trust expenses or due to adverse tax law changes affecting treatment of the Options.

We do not actively manage the portfolio. Except in limited circumstances, the trust will hold, and continue to buy, the same securities even if their market value declines.

Tax risk. The trust intends to elect and to qualify each year to be treated as a regulated investment company ("RIC") under Subchapter M of the U.S. Internal Revenue Code of 1986, as amended (the "Code"). As a RIC, the trust will not be subject to U.S. federal income tax on the portion of its net investment income and net capital gain that it distributes to unit-holders, provided that it satisfies certain requirements of the Code. If the trust does not qualify as a RIC for any tax-able year and certain relief provisions are not available, the trust's taxable income will be subject to tax at the trust level and to a further tax at the unit-holder level when such income is distributed.

Securities offered through Cowen Prime Services, LLC, a broker-dealer registered with the U.S. Securities and Exchange Commission and a member of FINRA and SIPC. Cowen Prime Services, LLC is a separate unaffiliated entity from Alaia Capital, LLC and is headquartered at 599 Lexington Avenue, New York, NY 10022.
